

# GO GREEN

## ENJOY TAP WATER

1

## IT'S THE RESPONSIBLE CHOICE

- Producing plastic bottles and transporting water requires a lot of energy and resources... just to land in the waste bin!

2

## IT SAVES MONEY

- Bottled water costs money. Tap water is free for you!

3

## IT'S SAFE and TASTES GOOD

- Well-maintained drinking sources, where filters are regularly exchanged, provide a safe alternative to bottled water
