

## Activity Report on Awareness Programme In the month of January 2020

On 3<sup>rd</sup> & 4<sup>th</sup> January 2020, from CERC – ENVIS Team, Ms. Divya Namboothiri along with MS. Bhigisha Makwana (CSR – IKEA team), visited Behrampura and Juhapura locality of Ahmedabad. There were around 45 and 65 participants from each locality respectively. The Female section of the society was addressed about the ill effects of single use plastics on environment. They were also educated about environment friendly products, its benefits and its positive impact on our health and environment. Due to ban on single use plastics, there is more demand for bags made of cloth material; this would also develop a source of income for them. Hence, the women were encouraged to stitch bags and sell so as to create an employment.

Food waste management is a menace faced by the community and by the municipal corporations. Food waste could be used to develop compost or manure, which could be sold for earnings. The women were lectured on how to make compost using kitchen waste.
