

Report on International Day for the Preservation of the Ozone Layer, 2023

16/09/2023

Ozone layer, as we all know is the first line of defense against the potentially harmful UV radiations from the rays of sun. Every year on 16th September, the world celebrates the International Day for the Preservation of the Ozone layer. The theme of this year's ozone day was "Montreal Protocol: Fixing the ozone layer and reducing the climate change". The usage of certain kinds of materials (Ozone depleting substances) for Insulation, Building materials, refrigeration led to a considerable depletion in the ozone layer.

To generate the awareness regarding the Ozone layer, Ozone depletion, Montreal protocol and Ozone layer recovery, two sessions on the same were organized by the Consumer education and research Centre. Ms. Divya Namboothiri (Programme officer, CERC-EIACP) conducted an awareness session on 16th September, at Apollo International School, Ahmedabad where about 300 students of class 6th to 10th attended the talk. Mr. Karan Thakkar (Information officer, CERC-EIACP) conducted an awareness session on Ozone layer, Montreal protocol and UV index at Science City, Ahmedabad on the same day. Around 40 participants attended the talk. A total of around 340 people were sensitized by the team of CERC-EIACP team.
